• small bag with packed recess and lunch
• water bottle
• wide brim hat
• spare pair of clothes/underwear
• sensible footwear and clothes for playing, running and jumping!

Program Outline

11:15am Pre-school students arrive.
• recess time: eat and play

11:30am—1:00pm: Pre-school students join the K-2 class.
• shared story
• Play-based learning activities

Engaging in play based learning enables children to use and develop thinking skills such as problem solving, reasoning and lateral thinking. It offers opportunities to interact with others, develop communication strategies and work in collaboration with peers and adults. It can foster literacy, numeracy and the development of scientific concepts. As children are empowered to make decisions and initiate play, they become confident and motivated learners. This in turn fosters responsibility and self regulation. Play also provides children with many opportunities to resolve conflict, challenge unfair play and embrace diversity.

(Reference: Play-based Learning, by Debbie Cole

1:00 - 1:30pm Lunch time.
• eat and play

1:30 - 2:40pm
• Gross motor activities and fundamental movement skills session

Gross motor skills are important prerequisites for the fine motor skills needed in the classroom setting. Learning situations require sitting on the floor and at desks, attention and concentration. These situations require:
• Core stability
• Balanced and bilateral coordination
• Trunk rotation and midline crossing
• Motor planning

Fundamental movement skills are the building blocks of movement and allow for successful participation in games, sports and other activities. These activities assist with body/spatial awareness and motor planning ability. Motor Planning is the ability to conceive, organise and carry out a sequence of unfamiliar actions. These activities may assist to regulate a child’s level of alertness/availability for learning.
